"for medical technology, for life care"

杭州福美医疗器械有限公司
HANGZHOU FORMED MEDICAL DEVICES CO., LTD.

ABOUT US:

We are a professional factory of medical devices since 2011, located in the beautiful Hangzhou, China. We have comply with ISO 14644 cleanrooms workshop, laboratory and warehouse, we focus on the development and research, production, sales and any technical support of medical devices.

Our product family including Anaesthesia, Respiration, Gastroenterology, Urology, Wound Drainage and Surgical. Main products cover Laryngeal Mask, Introducer Bougie, Tracheal and Bronchial Tube, Anaesthetic Mask, Resuscitator, CPAP Mask, Breathing Circuit, Filter&HMEF, Oxygen Mask, Closed Suction Catheter, Foley Catheter, Enteral Feeding, Wound Drainage.

We have a professional team that has more than 20 years' experience in Medical Devices. We have ISO 13485, CE and US FDA certificates. All products are under Medical Devices Quality Management System. We also provide OEM and ODM to the market. Strictly control of research & design, product process, inspection and testing and post-market services. We always keep providing high quality products to the world.

LARYNGEAL MASK AIRWAY

- Silicone, PVC, Reinforced, Preformed, Double lumen -

喉罩通气道

" for medical technology, for life care "

杭州福美医疗器械有限公司

HANGZHOU FORMED MEDICAL DEVICES CO., LTD.

LARYNGEAL MASK AIRWAY

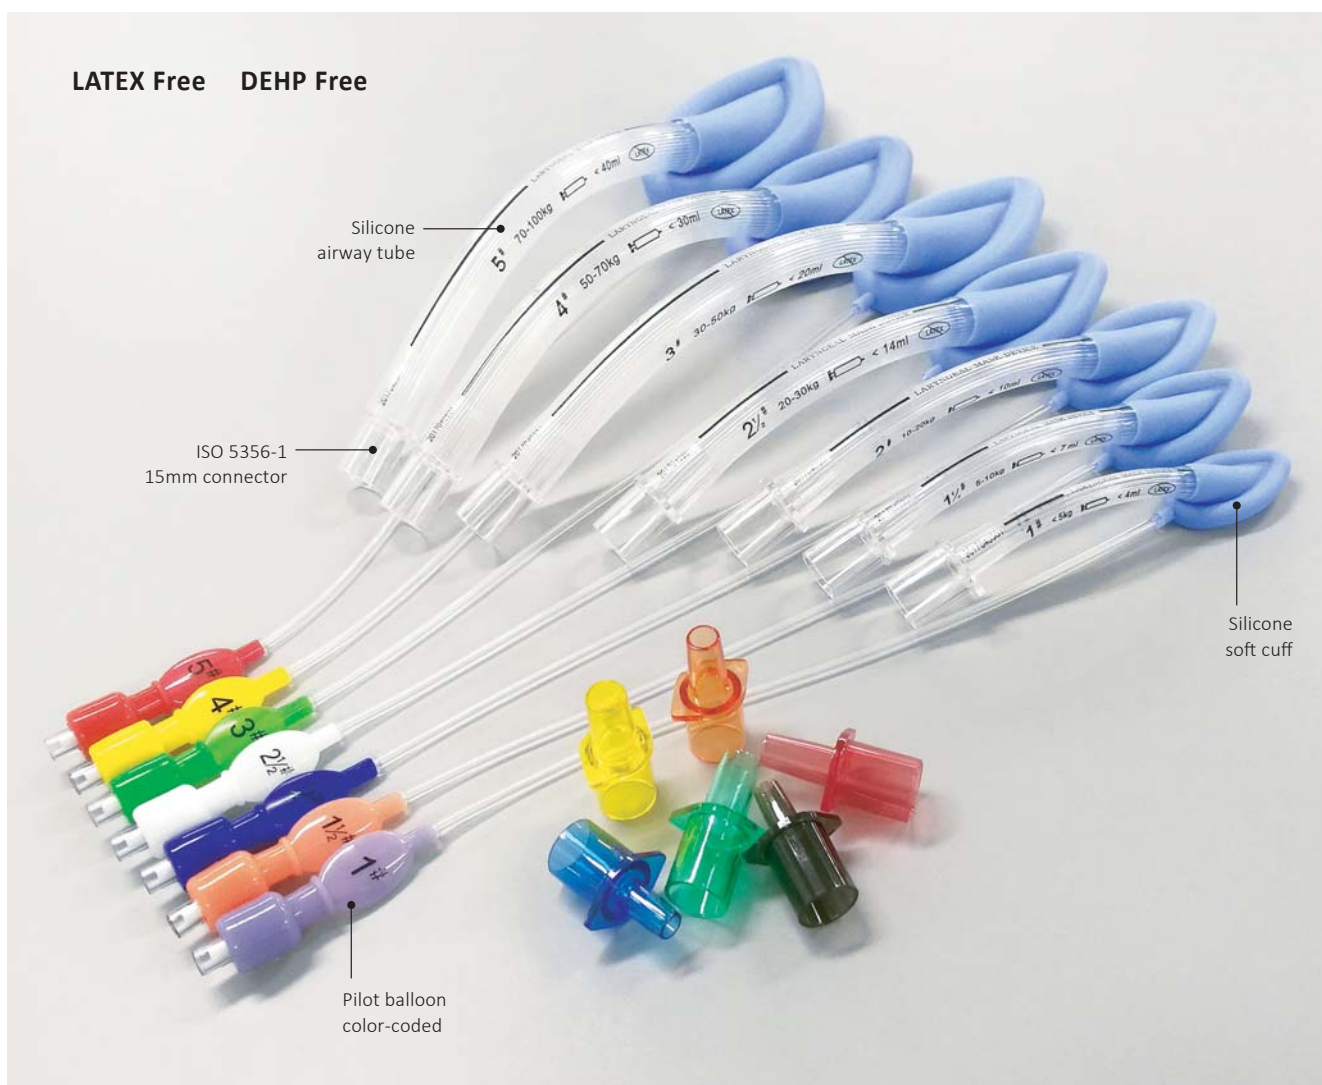

- Silicone, PVC, Standard, Reinforced, Preformed, MRI -

FEATURES AND BENEFIT:

- Made of medical silicone or PVC, have good biocompatibility.
- Exclusive soft cuff can be insert comfortable and increasing sealing.
- Kink-free tube eliminates the risk of airway tube occlusion.
- Reinforced designed for ENT, ophthalmic, dental and neck surgeries.
- Have different sizes, suitable for neonate, infant, child and adult.
- Different colors of cuff, Color-coded balloon and connector.

特点描述:

- 医用硅胶材料或医用PVC材料制成，无毒无刺激。
- 柔软的罩囊具有良好舒适度和密封性。
- 导管有良好的抗扭结功能，减少通气堵塞。
- 加强型喉罩具有很好的柔软性和弹性。
- 规格齐全，适合新生儿到成人。
- 有不同颜色罩囊和色标接头可供选择。

* Different colors of silicone cuff:

Double Lumen Laryngeal Mask, with Gastric Lumen

- Silicone, Reinforced, Preformed -

FEATURES AND BENEFIT:

- Made of medical silicone, have good biocompatibility, non-toxic.
- Exclusive soft cuff can be insert comfortable and increasing sealing.
- Kink-free tube eliminates the risk of airway tube occlusion.
- Gastric lumen managing the gastric content and stomach distension.
- The connector with Bite-block can prevent occlusions.
- Have different sizes, suitable for neonate, infant, child and adult.

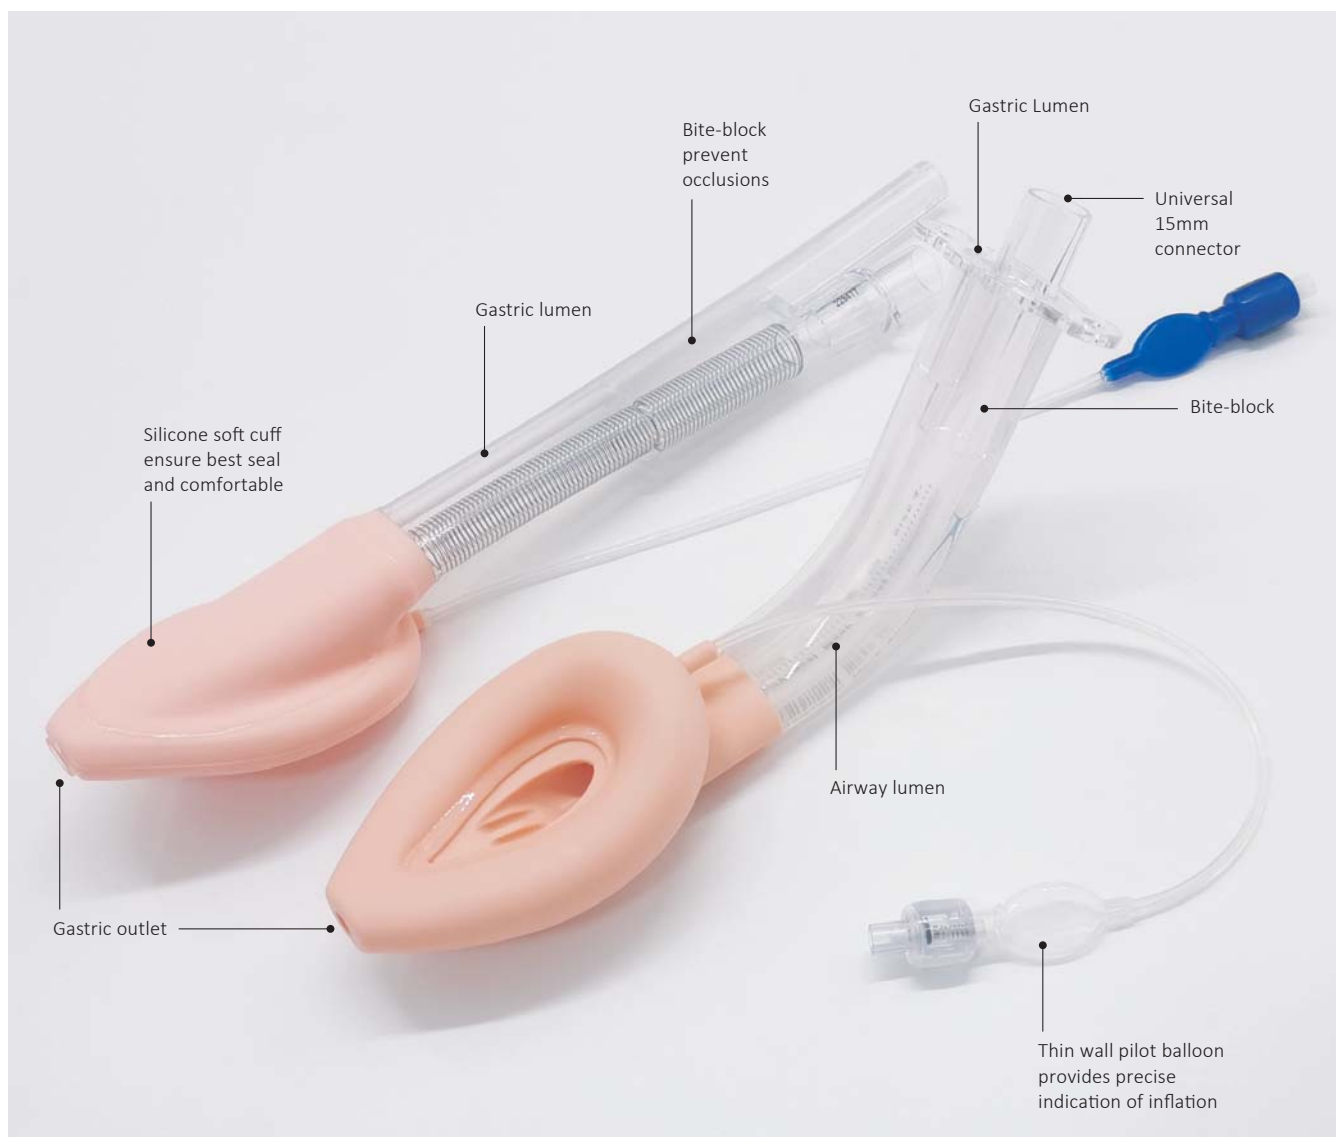

特点描述:

- 医用硅胶材料制成，无毒无刺激。
- 柔软的罩囊具有良好舒适度和密封性。
- 导管有良好的抗扭结功能，减少通气堵塞。
- 胃管引流腔道能降低胃内容物反流和胃胀气的风险。
- 带牙垫功能设计有效防止咬扁。
- 规格齐全，适合新生儿到成人。

- 重复性使用。

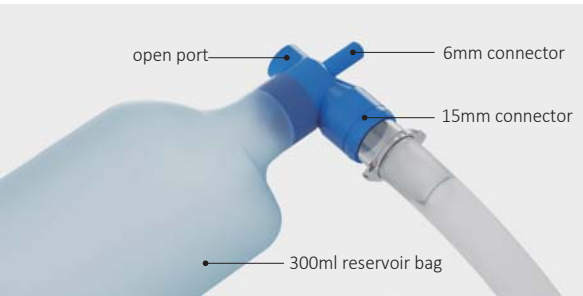

Oxygen Reservoir Bag

Blue-bag

Oxygen Reservoir Bag, Blue-bag *New!!!*

呼吸袋

The Oxygen Reservoir Bag is intended as a post operative, recovery room, breathing attachment for use once a patient is disconnected from an anaesthetic circuit.

The Blue-bag consists of a reservoir bag and T-piece connector, a 15mm connector to Laryngeal Mask or Endotracheal Tube, a 6mm connector to oxygen tubing and a 10mm exhalation port.

FEATURES AND BENEFITS:

- Medical grade material, DEHP FREE & LATEX FREE.
- Bag inflation and deflation provides visual indication of respiration.
- Reservoir bag fills with oxygen during expiration to increase oxygen concentration delivered.
- Reliable FiO₂ concentrations of 50% at 3L/min and 70% at 6L/min.
- Light weight minimal pull on airway device.

MDR&FDA

" for medical technology, for life care "

杭州福美医疗器械有限公司
HANGZHOU FORMED MEDICAL DEVICES CO., LTD.

INTRODUCER, BOUGIE, GUIDE, EXCHANGE

FEATURES AND BENEFIT:

- The Introducer / Bougies used to facilitate endotracheal intubation.
- Made of medical grade PE, LATEX Free, Flexible.
- Curved tip can be passed blindly into the trachea when visualization of the glottis is inadequate to guide placement of endotracheal tube.
- Distal rounded smooth tip allows the bougies to be inserted without damaging the soft tissue.
- Memory retention allows shaping to individual preferences and needs.
- Clearly graduated marking provides depth indication to ensure correct placement.
- Have different sizes, suitable for pediatric, child and adult.

LATEX Free

DEHP Free

PVC Free

MDR&FDA

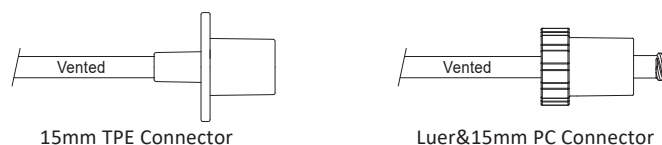

Various tips:

Customized colors:

Different connectors:

How to know if intubation is expected to be difficult or not ?

Structures Visualised	Grade 1	Grade 2	Grade 3	Grade 4
Pre-anesthesia				
Pharyngees (mallanpati)				
If > 2 Mallampati risk of DI due to bad visualisation of vocal cords				
Laryngoscopy				
Laryngees (Cormack & Lehane)				

Bougies device used in case of difficult intubation (Cormack superior to 2):

- Standard procedure recommendation for difficult intubation is to use as first intent long and flexible guides.
- This technique is very effective. According to several studies, the bougies treat more than 96% of difficult intubations.
- The bougie is the first intent device in the case of difficult intubation.

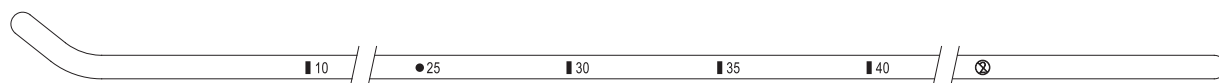

INTRODUCER, BOUGIE, GUIDE, EXCHANGE

We have many ranges of Endotracheal tube Bougies.

PA210315TDE	15Fr	5.0mm	70cm	ID 6.0mm - 10.0mm

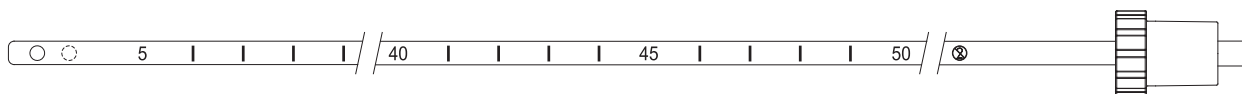

* 5pcs/box, 100pcs/ctn

with 2 connectors:

- * 1pc 15mm TPE Connector
- * 1pc Luer-lock & 15mm PC Connector

Tracheal Tube Introducer (Exchange Tube)

Vented tip

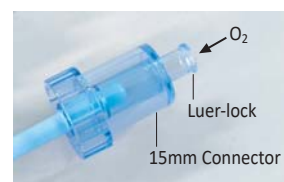

FEATURES AND BENEFIT:

- Used to facilitate uncomplicated, atraumatic endotracheal tube exchange.
- Made of medical grade PE, LATEX Free, Flexible.
- Blunt tip is atraumatic to internal structures.
- Distal side port help to ensure sufficient air flow.
- 1 CM markings facilitate accurate placement with endotracheal tubes.
- Removable adapter permit ventilatory if necessary during exchange procedure.

ENDOTRACHEAL TUBE

- Standard and Reinforced, uncuffed and cuffed -

FEATURES AND BENEFITS:

- Made of medical grade PVC, for single use only.
- Four types: Standard and Reinforced, uncuffed and cuffed.
- Murphy eye reducing the risk of occlusion and maintaining airflow.
- High volume low pressure cuff providing good sealing.
- Radiopaque line allowing clear identification under X-ray.

特点描述:

- 医用PVC材料制成，无毒无刺激。
- 包含普通无囊、普通带囊、加强无囊和加强带囊。
- 墨菲孔能降低阻塞的风险和保持通畅。
- 高容量低压力球囊能提供良好的密封性。
- 导管带有显影线。

PA180114	PA180214	14Fr	4.7mm	ID 5.5 - 10.0

特点描述:

- 导丝可以弯曲成所需形状，协助插管用。
- 由铝丝和塑料套管组成。
- 导丝头端光滑，可以减少粘膜损伤。
- 可选配件：导丝固定接头。

Rigid Intubating Stylet

New!!!

气管插管不锈钢导丝

The **Rigid Intubating Stylet** designed to work with Video Laryngoscopes and enable quick placement of Endotracheal Tubes.

FEATURES AND BENEFITS:

- Preformed shape, rigid stainless steel material.
- Options available to cover a broad range of patients and procedures.
- Rigid stylet enhances ET tubes control for fast intubation.
- Preformed shape easy matched the angle of laryngoscopes blades.
- Easy use handle for simple ET tubes securement and removal.
- Have Reusable and Single use options.

- Rigid Intubating Stylet, Reusable

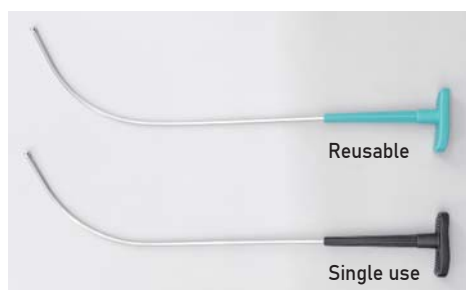

Compatible with high-level disinfectants and autoclave.

Endotracheal Tube Holder

气管插管固定器

FEATURES AND BENEFITS:

- Provide a fast and secure fixation of the Endotracheal tube.
- Accommodate multiple size of Endotracheal tube.
- Bite block protects patient teeth and gums.
- Allow in-use suctioning of the oropharynx.

特点描述:

- 提供快速、安全的气管插管固定。
- 可容纳多种尺寸的气管插管。
- 咬嘴能保护患者的牙齿和牙龈。
- 允许在使用中进行口咽部吸痰。

TRACHEOSTOMY TUBE

- Standard and Reinforced -

FEATURES AND BENEFITS:

- Made of medical grade PVC, for single use only.
- Four types: Standard and Reinforced, uncuffed and cuffed.
- Anatomically shaped 90° design for easy insertion and fixation.
- High volume low pressure cuff providing good sealing.
- Radiopaque line allowing clear identification under X-ray.
- Fixation flange design with simple and safe locking mechanism.
- With inner cannula and comfort neck band.

特点描述:

- 医用PVC材料制成，无毒无刺激。
- 包含普通无囊、普通带囊、加强无囊和加强带囊。
- 解剖型90°弯曲设计，易于插入和固定。
- 大容量低压力球囊能提供良好的密封性。
- 固定法兰设计，锁紧机构简单安全。
- 导管带有显影线。
- 带有内置套管和舒适的颈带。

ENDOBRONCHIAL TUBE

- Double-lumen

Double-lumen Endobronchial Tube

双腔支气管插管

FEATURES AND BENEFITS:

- Made of medical grade PVC, for single use only.
- Two types: left-sided and right-sided.
- The Pilot balloons printed with Tracheal (Clear) and Bronchial (Blue) for easy identification.
- Smooth inner lumens allow easy passage of Bronchoscopes.
- Pre-loaded stylet to help tube maintain shape for easier intubation.
- Packed with switch connector and two low friction suction catheters.
- Radiopaque line allowing clear identification under X-ray.

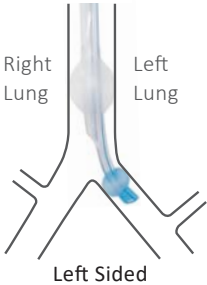

特点描述:

- 医用PVC材料制成，无毒无刺激。
- 包含左型和右型两款类型。
- 指示气囊上印有气管和支气管字样，便于识别。
- 导管内腔光滑使支气管镜易于通过。
- 预装导丝帮助导管保持形状，便于插管。
- 包装内配有连接头和两根吸痰管。
- 导管带有显影线。

麻醉呼吸回路

"for medical technology, for life care"

杭州福美医疗器械有限公司
HANGZHOU FORMED MEDICAL DEVICES CO., LTD.

Anesthesia Circuits 麻醉回路

- Corrugated, Expandable, Smoothbore, Duo-limbo, Coaxial -

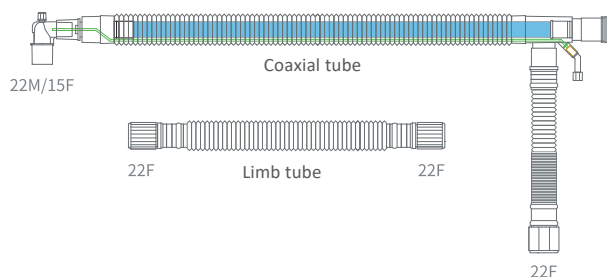

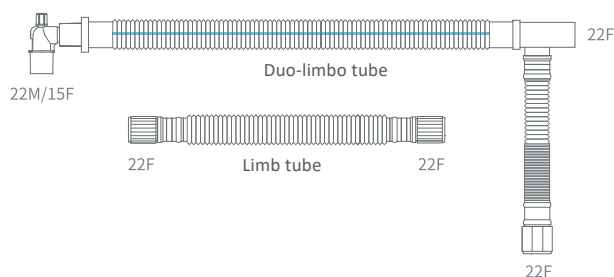

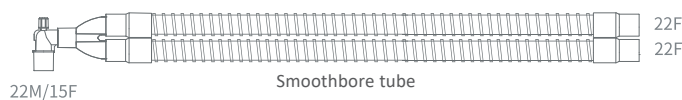

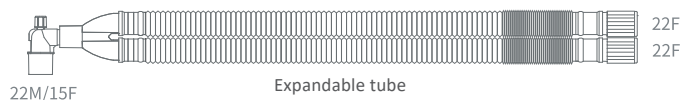

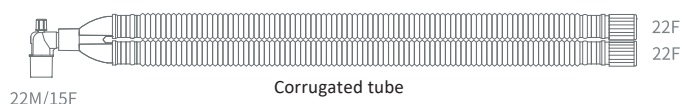

FORMED offers a wide range of anesthesia breathing circuits available in different lengths and configurations for your clinical needs and requirements.

FEATURES AND BENEFITS:

- Proper design assures good conformability and lower tube resistance.
- Tube types: Corrugated, Expandable, Smoothbore, Duo limbo, Coaxial.
- Size: Adult 22mm, Pediatric 15mm.
- Available with different length.
- Optional accessories: Reservoir bag, HME, Limb, Catheter Mount and Anesthesia Mask.

特点描述:

- 有良好的顺应性和低气流阻力。
- 有多种管路可供选择。
- 规格：成人22mm，儿童15mm。
- 可以按客户要求定制不同长度。
- 根据不同需求选择组合配件。

Anesthesia Circuits

波纹管回路

REF number	Tube type, Length	Size

- with 40cm Limb tube: Corrugated or Expandable tube.

呼吸回路

Breathing Circuits

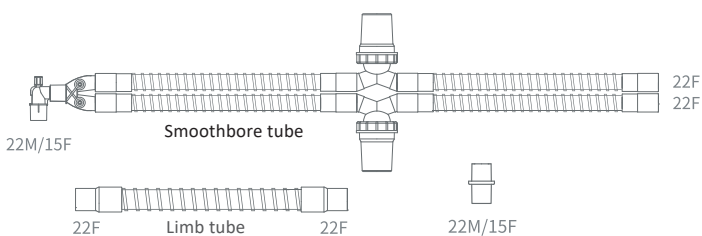

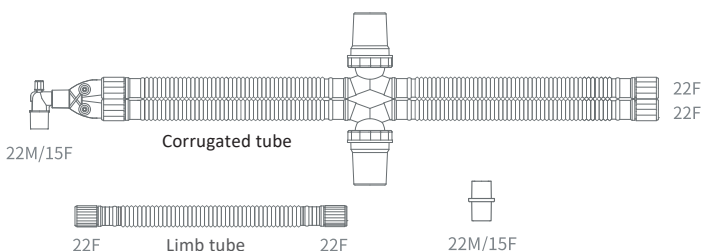

- Corrugated, Expandable, Smoothbore tube, with water trap -

FEATURES AND BENEFITS:

- Y connector with monitoring port, convenient for sampling and detection.
- Proper design assures good conformability and lower tube resistance.
- Water trap collects condensate, decreasing the pollution ratio of respiratory machines.
- International standard connector, matched with multiple respiratory machines.

特点描述:

- Y型接头带孔便于取样和监测。
- 有良好的顺应性和低气流阻力。
- 积水杯能有效收集冷凝水，减少污染发生。
- 接头符合ISO标准，能与呼吸机很好的配合。

Breathing Circuits

- with 40cm Smoothbore Limb tube.
- with 1 Connector 22M/15F.

Optional Accessories

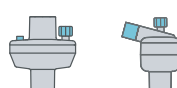

- Limb -

- Catheter Mount -

- HME -

- Anesthesia Mask -

- Reservoir bag -

- Connector -

- Water trap -

Reusable Silicone Circuits

重复性硅胶回路

- Reusable Anesthesia Circuit, Reusable Breathing Circuit -

FEATURES AND BENEFITS:

- Made of medical Silicone, have good biocompatibility.
- Proper design assures good conformability and lower tube resistance.
- Low airflow resistance directly bonded connectors to the tube for avoiding leakage risks.
- Size: Adult 22mm, Pediatric 15mm.
- International standard connector, matched with multiple respiratory machines.

特点描述:

- 医用级硅胶材料制成，有良好的生物相容性。
- 有良好的顺应性和低气流阻力。
- 低气流阻力直接将接头连接至管路，避免泄漏风险。
- 规格：成人22mm，儿童15mm。
- 接头符合ISO标准，能与呼吸机很好的配合。

Catheter Mount

呼吸短管

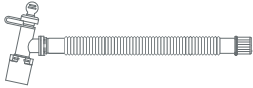

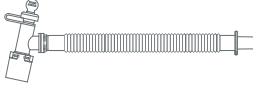

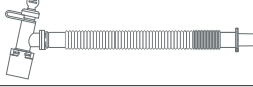

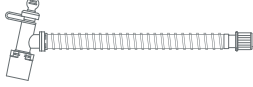

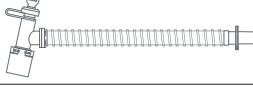

- Expandable, Corrugated, Smoothbore -

FEATURES AND BENEFITS:

- Suitable for use of anesthesia, respiratory and resuscitator.
- The 15mm tubes allows flexibility during operative and clinical procedures when patient manoeuvring may be required.
- Tube types: Corrugated, Expandable and Smooth-bore.
- Connector types: Elbow, Double swivel with or without Elastomeric cap, Luer-lock etc.
- 22mm F / 15mm M end connectors allow for secure fitting to all Y piece meeting the approved standards.

Breathing Filters

呼吸过滤器/人工鼻

- Bacterial and Viral Filter, Heat and Moisture Exchanger, Spirometry Filter -

FEATURES AND BENEFITS:

- Moistening, warming and filtering gas output from respiratory machine and input in patients.
- Utilized in combination with breathing circuits and tracheal tubes, anesthesia masks.
- Offering cross-contamination protection for patients and equipment when the clinical gas pass through.
- High bacterial viral efficiency >99.99%, insulation and moisturizing.
- With Catheter Mount or Elbow connector is available.

Silicone High Flow Nasal Cannula

高流量鼻氧管

FEATURES AND BENEFIT:

- High flow device used for cope-chronic obstructive pulmonary disease, ICU, Respiratory and Sleep therapy.
- Provide warm humidified air with enriched oxygen concentration at flow rate up to 60 L/min to patients via cannula.
- The prongs made of medical grade Silicone, have good biocompatibility, enhanced patient safety and comfort.
- The flexible tube minimized internal condensation in the cannula.
- The symmetrical design can be connected from either the left or right side, can help caregivers save time and effort.
- Headgear quick clips allow for fast and convenient removal of cannula.
- Have different sizes, suitable for adult, for single patient reuse.

Closed Suction Catheter

密闭式吸痰管

Clinical Practice:

- **Hospital:** economic, no need to stop machine, saving hospital's cost.
- **Nurse:** improving mechanical ventilation's effectiveness, successful rescue rate, and lessening the workload of doctors and nurses.
- **Patient:** decreasing the possibility of airway infection, lessening complication, improving patient's life quality, preventing relative pneumonia of respiratory machines

FEATURES AND BENEFIT:

- Double Swivel Elbow is design for endotracheal intubated patients, that provides flexibility without connectors.
- One-way irrigation port to prevent spayback for optimum cleaning.
- Conical waterproof joints for cleaning of the external part of the tube.
- Protective polyurethane sleeve impermeable is flexible and resistant for protection of the healthcare.
- Multiperforated catheter with non-traumatising tip prevents injury.
- Depth marks enables controlled and deep aspiration.
- Black mark indicates the correct positioning of the tube tip.
- Secured thumb control valve for locked aspiration system.

Suction Connecting Tube

吸引连接管

FEATURES AND BENEFITS:

- Made of transparent medical PVC material for better visualization.
- Kink-resistant tooth-like structure to prevent possible occlusion.
- Available with different connectors, which can connect with suction catheter or yankauer handle.
- Length can be customized.

without Yankauer

Insufflation Tubing

气腹管

FEATURES AND BENEFITS:

- Designed to withstand high gas flow rates to allow rapid, controlled and safe insufflation.
- Tubing is flexible, non-obstructive, lightweight and highly resistant to plication.
- The filter membrane provides excellent barrier to patient/insufflator cross contamination.
- Filtration efficiency: Bacteria 99.999%, Particles and Viruses 99.99%.
- The various fittings ensure compatibility with insufflators.
- The secure Luer-lock fitting fits on all available trocars.
- Sterilized by EO.

Gastric Calibration Tube

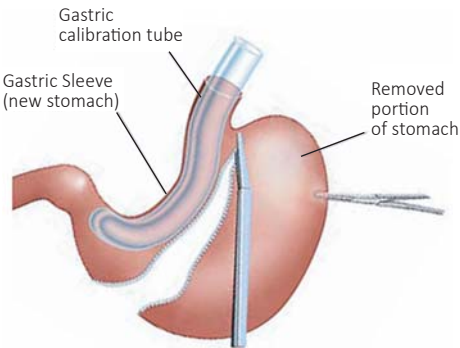

Gastric Calibration Tube New!!!

The **Silicone Gastric Calibration Tube** is indicated for use in gastric and bariatric surgical procedures to provide visible and tactile delineation of the stomach and with the ability to decompress the stomach, drain and remove gastric fluid.

FEATURES AND BENEFIT:

- Made of 100% medical silicone, have good biocompatibility.
- Easy introduction and natural placement in the stomach or placed by endoscopic way.
- Kink-free tube eliminates the risk of airway tube occlusion.
- Low pressure soft cuff can be inflated by air or saline suitable for calibration.
- Smooth blue tip with multiple holes allowed easy suction gastric juices.
- Clearly graduated marking provides depth indication to ensure correct placement.
- Sterilized by EO.
